

STFC/Te2v collaboration brings benefits for both parties

The Challenge

Teledyne e2v recognised that access to an accelerator and radiation test facility would assist their sub-system development and product optimisation and STFC required a supported accelerator platform for industrial and academic engagement.

The Solution

Through collaboration with STFC Daresbury Laboratory, Teledyne e2v has access to the Linac Test Facility and [Compact Linac](#). The expertise of STFC's staff, together with the support of Teledyne e2v, ensures the availability of a reliable platform.

The Benefits

STFC provides facilities for Teledyne e2v to develop integrated modules and sub-systems and STFC benefits from the support of Teledyne e2v to provide a reliable platform for academic and industrial engagement.
